ResQVision

PLATFORM OVERVIEW

UAV TEAMS + COASTAL OPERATIONS

# From aerial footage to a shared coastal picture.

Camera AI, recorded footage and 3D context for crews and teams reviewing coastal activity.

Coastal AI field experience with Surf Life Saving NSW's SAIL programme.

01 AERIAL RECORDING

## Detect people. Follow movement.

People and vessels in suitable aerial video, with detections and visible movement tracks.

**Watch footage**

02 RESQTWIN RECORDINGS

## Understand the scene.

Camera footage, detections, maps and 3D terrain. Coastal and maritime examples.

**Coastal footage**

**Bangkok footage**

03 HUMAN REVIEW / OPERATOR WORKFLOW

## See the evidence. Make the call.

Check the footage and context, then use your team's established response process.

**IN THE RECORDINGS**

Aerial detections and movement tracks
Camera, map and 3D scene together

**PLAN WITH YOUR TEAM**

Aircraft, feed and location accuracy
Live delivery and operator workflow

## See the work. Plan the next step.

Bring representative footage and the task your team needs to solve.

Alex Piatek | ap@resqvision.com

Live feeds and integration scope are agreed with your operating team.
